DETAILED ACTION

Allowable Subject Matter

1. Claims 1-19 are allowed.
2. The following is an examiner's statement of reasons for allowance:
 - With respect to claim 1, the Prior Art does not disclose selectively coupling either a first motor or a second motor to a fan and a control unit that controls the selector mechanism such that either of the first motor or the second motor is selectively engaged to the fan. Note that the examiner interprets engaged to mean physically linked together or connected.
 - With respect to claim 8, the Prior Art does not disclose a fan selector mechanism that selectively disposes either a first fan motor or a second fan motor in an orientation for driving a fan, and a control unit that controls the selector mechanism so that either of the first fan motor and the second fan motor is disposed in the orientation for driving the fan.
 - With respect to claim 15, the Prior Art does not disclose providing first and second fan motors as disclosed, and automatically disposing the fan motor subassembly in an orientation for disengaging the first fan motor from the fan and engaging the fan with the second fan motor when the measured performance characteristic of the first fan motor does not meet the specified fan motor performance requirement.
3. Therefore, based on the arguments and amendments presented by the Applicant, the Examiner acknowledges the Prior Art fails to make obvious the Applicant's claimed invention.
